

No.	Plugin	Description	Category
1	rakkess	Review Access - kubectl plugin to show an access matrix for k8s server resources	RBAC
2	kubectl-who-can	Show who has RBAC permissions to perform actions on different resources in Kubernetes	RBAC
3	kubectl-lint	A kubectl plugin to perform linting	Linting
4	kubectl-neat	Clean up Kuberntes yaml and json output to make it readable	Linting
5	ksort	Sort manifest files in a proper order by Kind	Linting
6	kubectl-debug	Debug your pod by a new container with every troubleshooting tools pre-installed	Debugging
7	kube-profefe	continuous profiling made easy in Kubernetes with profefe	Debugging
8	ksniff	Kubectl plugin to ease sniffing on kubernetes pods using tcpdump and wireshark	Networking
9	kubectl-swiftnp	A kubectl plugin for rendering details of Network Policies.	Networking
10	kubectl-trace	Schedule bpftrace programs on your kubernetes cluster using the kubectl	Networking
11	kubectl-capture	A kubectl plugin which triggers a Sysdig capture https://sysdig.com/opensource/inspect/	Networking
12	kubectl-plugin-pvc	A simple kubectl binary plugin for PVC operations	Storage
13	kubectl-dfi	List and show disk resources of images on Kubernetes nodes.	Storage
14	kubectl-unbound-pvc	List and show disk resources of images on Kubernetes nodes.	Storage
15	kubectl-df-pv	giving admins df (disk free) like utility for persistent volumes	Storage
16	kubectl-sudo	Run kubernetes commands with the security privileges of another user	Security
17	outdated	Find and report outdated images running in a Kubernetes cluster	Security

18	kubectl-kubesecc	Security risk analysis for Kubernetes resources https://kubesecc.io	Security
19	kubectl-enter	Exec into node via kubectl	Exec
20	kubectl-cssh	A kubectl plugin to ssh into Kubernetes nodes within separate tmux panes	Exec
21	kubectl-iexec	Kubectl plugin to interactively exec into a pod	Exec
22	kubectl-ssh	A kubectl plugin to ssh into a pod's node	Exec
23	kubectl-kcn	A script and kubectl plugin which makes it easier to ssh into nodes within your cluster.	Exec
24	duyguserbest kubectl-iexec	A script and kubectl plugin which makes it easier to ssh into nodes within your cluster.	Exec
25	kubectl-exec-all	kubectl plugin to execute a command in all running pods of a resource.	Exec
26	kubectl-nsenter	Simple kubectl plugin to take pod name, SSH onto node and spawn an nsenter shell	Exec
27	kvaps kubectl-ssh	Tiny plugin for connecting to node in the cluster over SSH	Exec
28	kubectl-warp	Kubernetes CLI plugin for syncing and executing local files in Pod on Kubernetes	Exec
29	kubectl-plugin-ssh-jump	A kubectl plugin to SSH into Kubernetes nodes using a SSH jump host Pod	Exec
30	kubectl-texec	Attach to the pod matching the label with Tmux	Exec
31	kubectl-dig	Deep kubernetes visibility from the kubectl	Visibility
32	kubectl-utility	Utility tool for observing k8s resources.	Visibility
33	kubectl-graph	A kubectl plugin to visualize Kubernetes resources and relationships.	Visibility
34	kubectl-tree	A kubectl plugin to browse Kubernetes object hierarchies as a tree	Visibility
35	kubectl-topology	A kubectl plugin that provides insight into the topology of a Kubernetes cluster.	Visibility

36	Pod-Dive	A kubectl plugin to dive into your Kubernetes nodes pods, and inspect them.	Visibility
37	kubectl-dashboard	Instantly get a Kubernetes dashboard	Visibility
38	kubelogin	kubectl plugin for Kubernetes OpenID Connect authentication (kubectl oidc-login)	Authn/Authz
39	k8s-pixy-auth	k8s plugin to authenticate against an OIDC compatible issuer using PKCE (pixy) flow	Authn/Authz
40	kubectl-login	Kubectl plugin for re-authenticate into OpenID Connect Provider via CLI	Authn/Authz
41	zjj2wry kubectl-login	The kubectl plugin is used to login to the kubernetes cluster by oidc authentication.	Authn/Authz
42	kubectl-pass	kubectl plugin for integration with pass (the standard unix password manager)	Authn/Authz
43	kubectl-ssm-secret	A kubectl plugin to allow import/export of kubernetes secrets to/from AWS SSM Parameter Store path.	Secrets
44	kubectl-decode-secret	A kubectl plugin to decode Kubernetes secrets	Secrets
45	kubectl-gopass	Plugin for kubectl to support reading and writing secrets directly from/to gopass	Secrets
46	kubectl-modify-secret	kubectl-modify-secrets allows user to directly modify the secret without worrying about base64 encoding/decoding	Secrets
47	weibeld kubectl-ctx	A kubectl plugin for interactively changing the kubeconfig context	Context/Namespace Switching
48	weibeld kubectl-ns	A kubectl plugin for interactively switching between namespaces in your cluster	Context/Namespace Switching
49	postfinance kubectl-ctx	Simple kubectl plugin to display/switch contexts	Context/Namespace Switching
50	kubectl-select-context	light kubectl plugin that prompts user to select config context	Context/Namespace Switching
51	kubectl-use	Plugin for simple switch kubernetes contexts and namespaces	Context/Namespace Switching

52	kubectx	Switch faster between clusters and namespaces in kubectl https://kubectx.dev	Context/Namespace Switching
53	kubectl-ns	Simple kubectl plugin to display/switch namespaces	Context/Namespace Switching
54	kubectl-use	Plugin for simple switch kubernetes contexts and namespaces	Context/Namespace Switching
55	kubectl-switch	Kubernetes multi-cluster command-line management tool	Context/Namespace Switching
56	caas-one kubectl-switch	Kubernetes multi-cluster command-line management tool	Context/Namespace Switching
57	juanvallejo kubectl-ns	Quickly view or change the current namespace via kubectl	Context/Namespace Switching
58	km	EKS MFA kubeconfig management tool. Thin wrapper for kubectl.	Context/Namespace Switching
59	ketall	Like <code>kubectl get all</code> , but get really all resources	Resource CRUDs
60	kubectl-grep	Filter Kubernetes resources by matching their names	Resource CRUDs
61	kubectl-all	kubectl plugin to list all resources in given namespace	Resource CRUDs
62	kubectl-watch	Watches Kubernetes resources	Resource CRUDs
63	kubectl-custom-cols	a kubectl plugin that help you customize output columns like a boss !	Resource CRUDs
64	kubepod	Search pods faster in kubectl	Resource CRUDs
65	kubectl-resources	Plugin to access Kubernetes resource requests, limits, and usage.	Resource CRUDs
66	kubectl-free	Show various requested resources on Kubernetes nodes	Resource CRUDs
67	kubectl-match-name	regex matching for resource names	Resource CRUDs
68	kubectl-eksporter	A simple Ruby-script to export k8s resources	Resource CRUDs
69	kube-capacity	A simple CLI that provides an overview of the resource requests, limits, and utilization in a Kubernetes cluster	Resource CRUDs
70	kubectl-rotate-pods	kubectl plugin to easily restart all pods of a deployment	Resource CRUDs

71	kubectl-terminate	kubectl-terminate, a kubectl plugin to remove finalizers and finally delete k8s resources	Resource CRUDs
72	kubectl-extension-versions	Filter Kubernetes resources by matching their names	Controller/Operator
73	kudo	A kubectl plugin to use kudo via kubectl CLI	Controller/Operator
74	ipick	A kubectl wrapper for interactive resource selection	Controller/Operator
75	kubectl-tmux-logs	A kubectl plugin to display container logs within separate tmux panes	Logging
76	kubectl-clogs	kubectl plugin to follow logs of multiple running pods	Logging
77	kubectl-mtail	Kubectl helper to get logs from multiple pods	Logging
78	kubectl-open-svc-plugin	kubectl open-svc plugin makes services accessible via their ClusterIP from outside your cluster	Uncategorized
79	kubectl-doctor	k8s cluster triage plugin - scan your cluster for anomalies (brew doctor equivalent)	Uncategorized
80	kubectl-view-serviceaccount-kubeconfig-plugin	A kubectl plugin that show a kubeconfig to access the apiserver with a specified serviceaccount.	Uncategorized
81	unfork	Kubectl plugin to find forked Helm Charts and other K8s resources and unfork them https://www.unfork.io	Uncategorized
82	kubectl-config-merge	A kubectl plugin for merging multiple kubeconfig files. A cli-runtime example.	Uncategorized
83	konfig	konfig helps to merge, split or import kubeconfig files	Uncategorized
84	kubectlsafe	Safe operations in kubectl with plugin kubectlsafe	Uncategorized
85	kubectl-rainbow	Simple binary to colorize output.	Uncategorized
86	kubectl-ansible	An ansible dynamic inventory plugin for kubernetes cluster nodes	Uncategorized
87	kubectl-server-version	A kubectl plugin for rendering the Kubernetes server version.	Uncategorized
88	kubectl-config-cleanup	A kubectl plugin for automatically cleaning up your kubeconfig	Uncategorized

88	kubectl-config-cleanup	A kubectl plugin for automatically cleaning up your kubeconfig	Uncategorized
89	kubectl-gitlab-bootstrap	Quickly add a Kubernetes cluster to a GitLab project	Uncategorized
90	kubectl-captain	kubectl plugin for captain	Uncategorized
91	kubectl preflight	Preflight Checks and Support Bundles Framework for Kubernetes Applications https://troubleshoot.sh	Uncategorized
92	kubectl support-bundle	Preflight Checks and Support Bundles Framework for Kubernetes Applications https://troubleshoot.sh	Uncategorized
93	kubectl-virt-plugin	Holds all scripts to create packages and manifest file required for publishing the virtctl binary as a krew package for kubectl.	Uncategorized
94	kcf	A CLI tool providing you with status & configuration of a Kubernetes cluster fleet	Uncategorized
95	kubepug	Kubernetes PreUpgrade (Checker)	Uncategorized
96	kubectl view-secret	Decode Kubernetes secrets	Secrets
97	kubectl-cilium	A kubectl plugin for interacting with Cilium.	Networking
98	kubectl-carbonetes-scan	Integrates container analysis directly into your cluster.	Container Security
99	kubectl-cyclonus	Analyze, explain, and probe network policies.	Networking
100	kubectl-view-webhook	Visualize your webhook configurations	Visibility
101	kubectl-translate	Helps migrate your app to run on Kubernetes. Generates K8s yamls, Helm chart, Operator, CI/CD pipeline, Kustomize overlays, etc.	Migration
102	kubectl-datree	Scan resources within your cluster for misconfigurations	Misconfiguration Detection
